The opportunity

Island asset for assessment by investors and maritime-sector operators.

01

Location

Located in Guanabara Bay, near Gradim, with maritime access to Niterói and Rio de Janeiro.

02

Use case

Potential offshore support, logistics, light maintenance, storage and low-impact marine services.

03

Conditions of use

Any development depends on title regularization, technical feasibility and licensing.

Offshore oil growth in Brazil

3.4 to 5.2

million barrels per day in the optimistic scenario described in the materials

Support infrastructure

Pre-Salt expansion may require supply vessels, logistics bases, ship maintenance, subsea equipment, inspection, storage, marine transport, environmental response and decommissioning.

The investment rationale requires current market confirmation.

Pre-Salt investment and offshore infrastructure

01

Companies cited

Petrobras, Shell, TotalEnergies, Equinor, BP, ExxonMobil, Karoon, Prio and Trident Energy.

02

Operating scope

FPSOs, wells, subsea lines, production flow, gas and CO₂ reinjection, equipment and maintenance.

03

Fields cited

Búzios, Mero, Atapu, Sépia, Tupi, Itapu, Raia, Campos, transfer-of-rights areas and new areas.

The materials identify Búzios and Mero as relevant projects for expansion and the service supply chain.

Guanabara Bay: a naval and offshore hub

Regional capabilities

The surrounding area includes shipyards, naval workshops, engineering companies, support bases, port infrastructure and specialized labor.

Niterói, São Gonçalo and Rio de Janeiro have a long tradition in vessel and platform construction, repair, conversion and maintenance.

The current status of assets, projects and contracts requires independent confirmation.

Strategic location of the island

Potential connections

Gradim and São Gonçalo

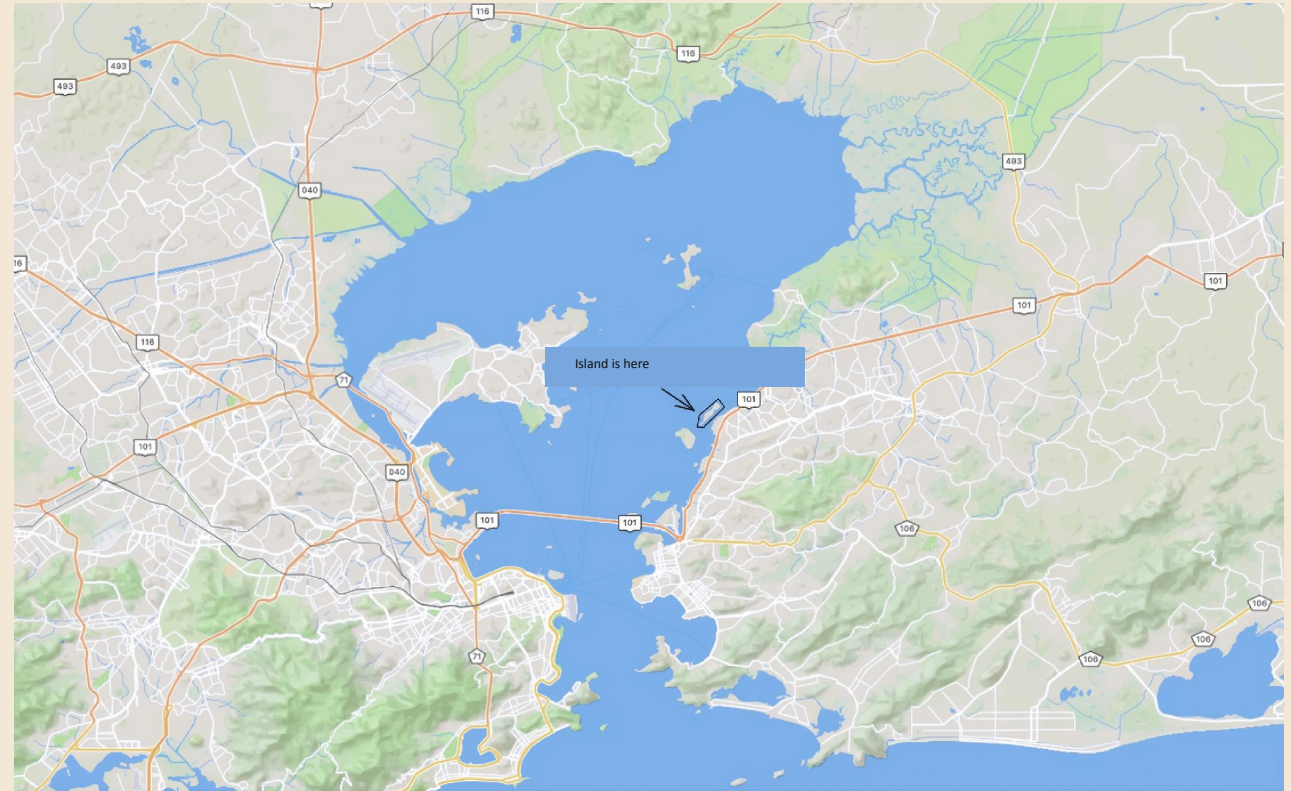

Connection to coastal areas, workshops, warehouses and service providers.

Niterói and Rio

Maritime access to naval, corporate and industrial-support centers.

Port of Rio and regional corridors

Potential complementary support for supplies, equipment and transportation.

Berthing, depth, infrastructure and permits require specific studies.

Physical and operational data

Island asset characteristics

0.5

nautical miles from the mainland

356,750 m²

island area

334 m²

mainland support base

8 m

draft

Potential logistics benefits

01

Gradim and the naval supply chain

Connection to land areas, workshops, warehouses, suppliers and specialized labor.

02

Bay and Port of Rio

Maritime connection to Niterói, Rio and other areas of the bay, with complementary supply support.

03

Multimodal integration

Potential connection between maritime and road transport, subject to verification of operations and access.

The area may also be assessed for monitoring, research, environmental education and ecological restoration.

Companies to approach

01

Marine support

Edison Chouest, Bram, DOF, Solstad, Svitzer and Wilson Sons.

02

Subsea and engineering

Oceaneering, Subsea7, Saipem, TechnipFMC, Helix, Baker Hughes, SLB and Halliburton.

03

Logistics and compliance

Monjasa, Blue Water Shipping, DNV, Bureau Veritas, ABS and inspection companies.

Operators such as Petrobras, Shell, Equinor, TotalEnergies, BP, ExxonMobil, Prio, Trident, Enauta and PetroReconcavo may be indirect customers or contracting parties.

Competitive advantages

01

Maritime location

Direct access to Guanabara Bay and potential to complement onshore facilities.

02

Industrial ecosystem

Proximity to shipyards, suppliers, naval labor and engineering companies.

03

Diversified uses

Offshore support, logistics, maintenance, research, tourism and environmental management, subject to feasibility.

Demand for inspection, maintenance, safety, environmental management and decommissioning may continue throughout the energy transition.

Value proposition for investors

Presence in Guanabara Bay, near an established naval and offshore ecosystem.

01

Distinctive location

Island asset with potential maritime access and proximity to suppliers and customers.

02

Commercial flexibility

Sale, lease, operating partnership or tailored development.

03

Specialized infrastructure

Potential to develop a complementary operation, subject to studies and approvals.

Investor invitation

01

Priority profiles

Offshore operators, marine support, logistics, subsea services, shipyards, decommissioning and maritime technology.

02

Available structures

Sale, long-term lease, operating partnership, joint venture or tailored development.

03

Next step

Technical visit, definition of the use rationale and initiation of documentary, technical and environmental due diligence.

The profile list represents a commercial target audience, not previously expressed interest.
